

AI For Real Estate Agents

Capture more leads. Convert more appraisals. Nurture every buyer.

Founders Pricing — Only 4 Spots Left

Real estate moves fast — buyers want answers instantly, sellers want consistent follow-up, and agents don't have time to chase every lead manually.

Our AI systems work alongside you to deliver fast responses, automated nurturing, and personalised communication tailored to every individual client.

Below is a concise overview of the three core systems we build for agents.

1. Instant Inquiry & Booking System

Instant AI Responses (24/7)

Every inquiry from Trade Me, OneRoof, or direct email receives an automated response within 5 minutes.

- Answers buyer questions
- Sends property files automatically
- Provides key features, context, and price guidance
- Written in your tone and voice

Self-Service Viewing Bookings

Buyers click "Book a Viewing" and select from your real-time availability.

- Syncs with your Google Calendar
- Prevents double bookings
- Works nights, weekends, and holidays
- Displays any scheduled open home times for the property

Buyer Qualification (Before They Book)

Before confirming a viewing, buyers answer:

- Finance status
- Timeline
- Property requirements
- Motivation (first home / upgrade / investment)

Their answers + lead score are sent directly to you.

Browse Your Other Properties

The system also displays your other available listings, increasing cross-property exposure.

2. Seller Post-Appraisal Nurturing System

Brand Analysis & Tone Matching

We analyse your brand, tone, local market, and communication style to ensure the emails truly sound like you.

This is why there's a setup fee: Each system is custom-built specifically for you. We study real emails you've written, learn your voice and style, and train the AI to write just like you do. The system also learns from any edits you make over time, getting better and more "you" with every interaction.

The result? Emails that genuinely feel like you wrote them yourself.

Custom Templates (Built For Your Area)

We create 7 personalised email templates based on your market, voice, and the type of homeowners you serve.

Hyper-Personalised Nurture Sequences

After an appraisal, you enter basic details + personal notes. The system generates a custom nurture sequence referencing:

- Your personal notes
- Recent sales relevant to their property
- Your local performance metrics
- Your tone and brand style
- The custom templates we built for you

You edit & approve all emails first — then the AI automatically schedules them.

Timeline-Based Sequences

Each seller receives a tailored timing sequence depending on their readiness:

- 3-month nurturing
- 6-month nurturing
- 12-18+ month nurturing

Morning Notifications & Quick Context Updates

Every morning you're notified with exactly which emails are going out that day and who they're going to.

Want to add something timely? Simply input a single prompt — like "mention the trail ride this weekend" or "ask they're attending the christmas parade" — and the AI regenerates your emails with the new context woven in naturally.

You choose the scope: Update all emails going out that day, select specific people, or just one individual. Rewrite at scale or fine-tune one-by-one — it's completely flexible.

Or just let them send as-is. Either way, you stay in control.

Auto-Refreshing Market Data

Emails automatically pull in your latest local sales data and market insights, so your nurture sequences are always current and relevant — even months after you set them up.

Success Broadcast Feature

Just sold a property? With one click, broadcast your win to your entire appraisal pipeline. The AI writes a personalised email to each lead — tailored to their specific situation and property — showing them your latest success.

You review and approve each message before it sends. One sale becomes dozens of warm, relevant touchpoints.

Full Tracking & Insights

Every email has full tracking: open rates, click-through rates, and engagement insights so you know exactly who's engaged.

3. Buyer Nurturing & Property Matching System

Automatic Lead Capture

Every online inquiry is automatically added to your buyer database with qualification answers attached.

Personal Notes → Personalised Outreach

Add details like "needs garaging", "wants lifestyle block", or "budget max \$1.2M". The AI uses them to tailor all communication.

New Listing → AI Finds Matches

When you publish a new property, the system:

- Identifies all buyers whose requirements match
- Generates personalised emails for each one
- Example: "Hey Mark, you mentioned wanting 4 bedrooms + 10 acres..."

You approve each message before sending.

FOUNDERS TIER — LIMITED AVAILABILITY

Special Discounted Pricing

We're offering special discounted rates to our founding clients as we build case studies and refine our systems with real-world feedback.

Rachel is using our system now and already getting excellent results — **100% positive feedback** from buyers and sellers using it.

Only 4 Founding Member Spots Remaining

Prices shown above are standard rates. Founding members receive significant discounts — message us to learn more.

II *Rachbot has completely transformed my real estate business. I used to wake up with anxiety, cringing at how many unanswered messages I had. Now I know every inquiry gets an instant, professional response while I'm with family or focusing on actually selling houses. It's taken the stress away and given me my freedom back.*
